PANORAMA

Your
Complete
Digital Solution

THE CONCEPT

PANORAMA is Your Complete Digital Solution, offering digital opportunities in a 360° perspective. The PANORAMA's DP-3 printing unit is highly reliable, offers market leading uptime, fast and easy start-up, and high print engine stability. PANORAMA comes as a stand-

alone digital press, and in a number of hybrid configurations with seamless integration of state-of-the-art flexo printing and converting units, covering a wide and varied spectrum of customer requirements - from standard, to all-round, and value-added.

The PANORAMA product line is the result of an extensive industry know-how and many years of product development. At Nilpeter, we strongly believe in offering full flexibility and efficiency through innovative product engineering, preferably all inline. And the PANORAMA represents exactly that.

We know that digital printing is a very important part of the future printing environment, and by combining digital and analogue printing technologies in just the right way, we have created a very powerful product.

The operator interface is another crucial part of the printing process, and with the new product line, we have created the most simple and operator-friendly platform ever. The PANORAMA truly is a complete product, delivered from one single supplier - **...your printing partner.**

THE JOY OF OPERATION

PANORAMA features a simple and highly intuitive user interface, presented on a 42" colour touch screen. The smart workflow management system, EQUIOS, ensures outstanding typeface optimisation, provides automated step and repeat functions, and matches a majority of Pantone colours.

The PANORAMA's ease of use enables you to respond to any customer requests - printing the exact quantity required with no minimum, no waste, fast turnaround, and low cost per label.

THE OPPORTUNITIES

PANORAMA comes as a stand-alone digital press, and in a number of hybrid configurations, all configured to fit customer requirements – all inline, from one supplier.

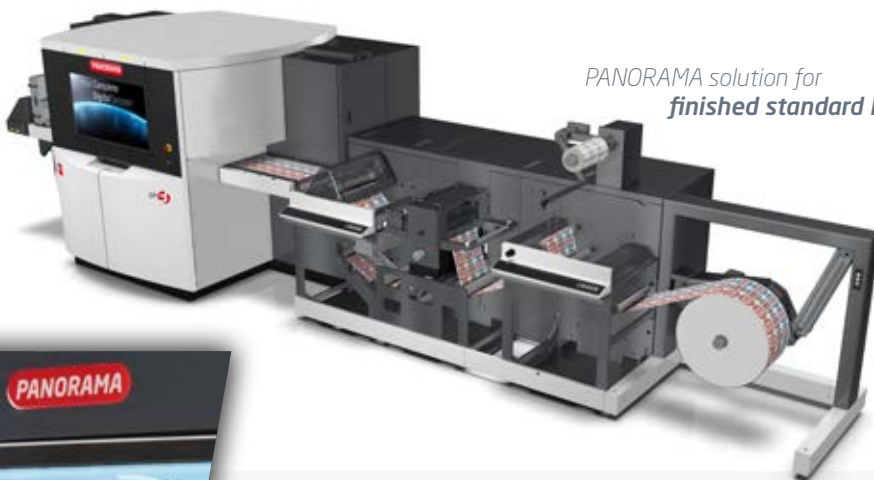

From standard to value-added, the PANORAMA hybrids create results that meet brand-owners' expectations and provide a multitude of opportunities to the printers.

THE NEXT STEP

Reach out to your local Nilpeter representative and set up a live demo of the PANORAMA at one of our state-of-the-art Technology Centers.

Nilpeter's global Technology Centers host large spaces for operating presses, well-equipped prepress areas, customer

lounges, as well as training and meeting rooms. Our multi-lingual teams are ready to show you the full potential of the press, and are prepared to print any job you want to see. We look forward to showing you the **PANORAMA** product line.
