

FB LINE

Your *Starting Line* for
High Performance

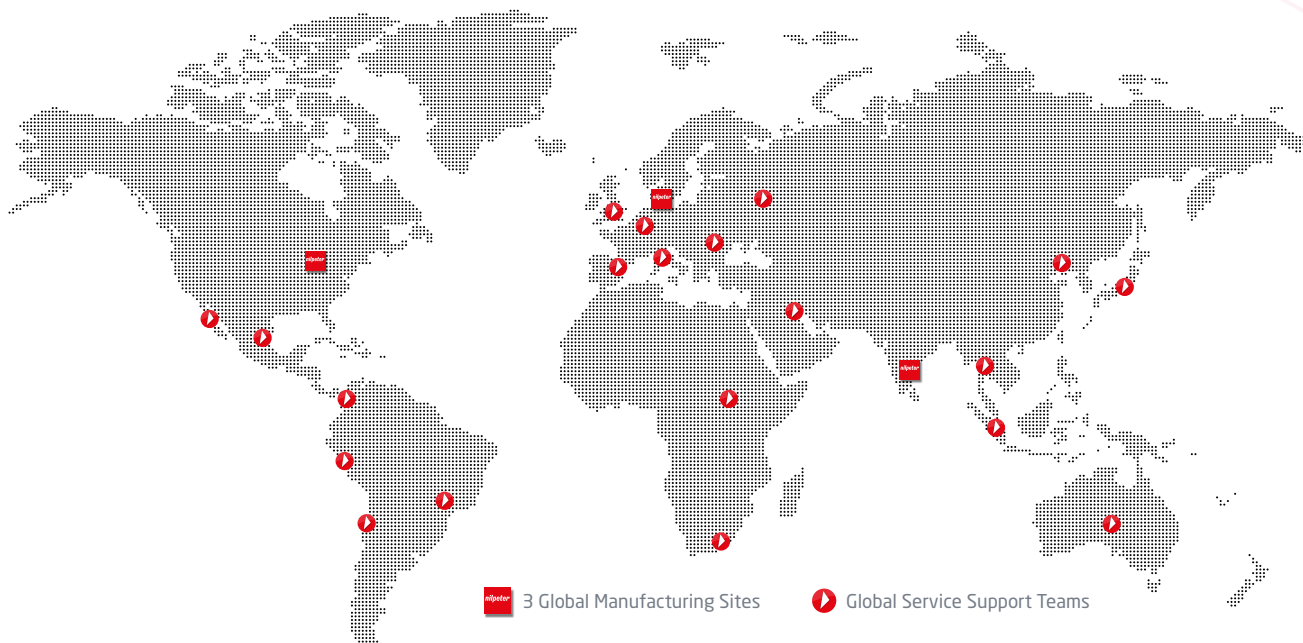

THE CONCEPT

The new FB represents the latest generation of highly efficient label printing. Nilpeter has added a large number of innovative features and packaged the press in an attractive, new design.

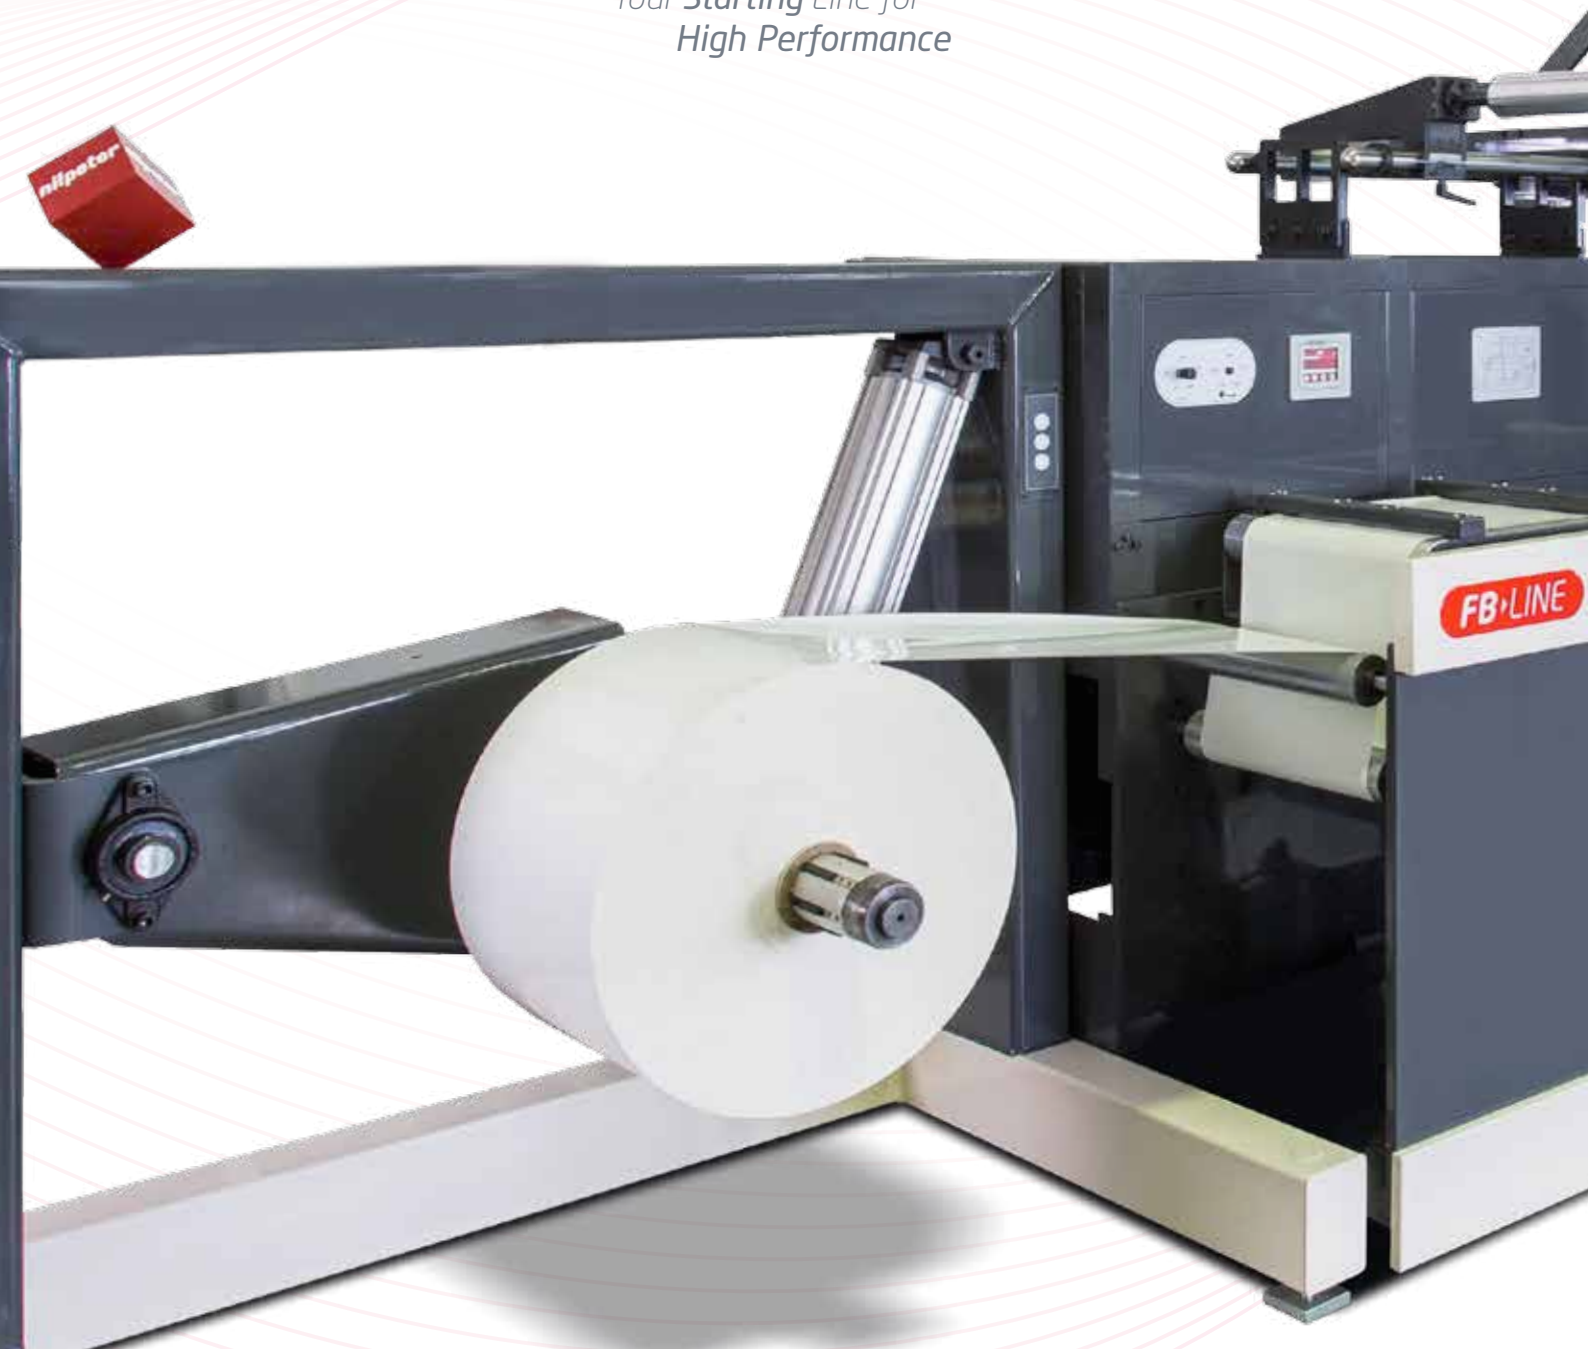

The new FB-Line is an answer to the request for increased automation, higher ease of use, and operator friendliness.

The new FB is introduced with a number of added features, such as Automated Plate Positioning System (APPS), pre-register and re-register functionality. The new FB is designed to print value-added labels in the most efficient way at high speeds. While the new FB looks entirely different, it will still feel intuitive to the printer already accustomed to work on the popular FB-Line.

THE JOY OF OPERATION

The new FB is a sophisticated workhorse offering high ease of operation and superior printing quality.

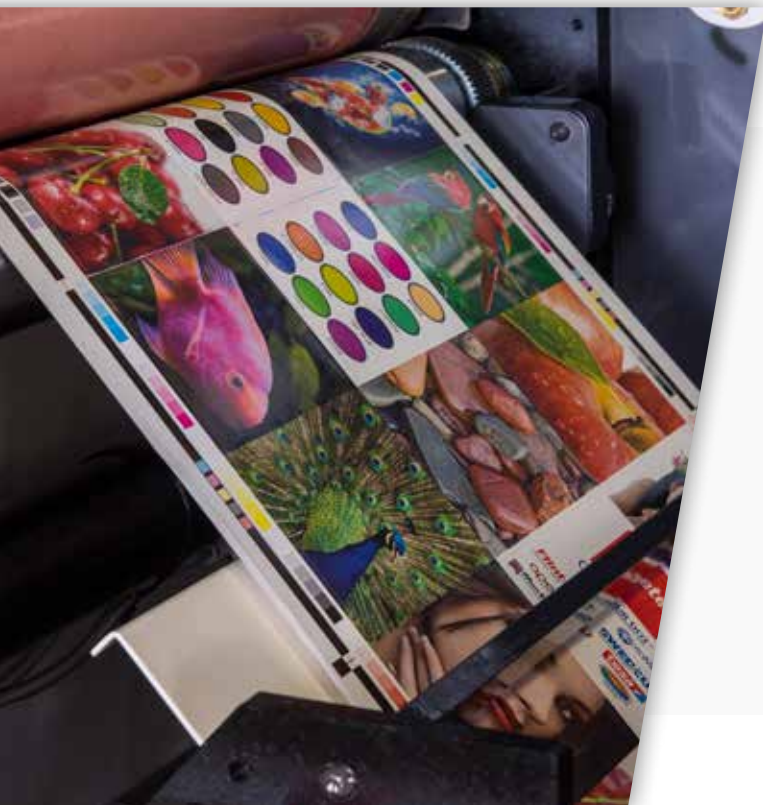

Increased operator friendliness is a central element in the design process for Nilpeter's new FB-Line. The flexo press is extremely simple to manage, even though we have added a number of technology advancements.

THE OPPORTUNITIES

Available in 13" and 16" widths, the new FB is the perfect choice for the flexible label printer. The flexo press is designed to deliver maximum flexibility at an affordable price. The printer can customise the press to meet a vast number of requirements - from a very basic configuration to an advanced configuration.

Innovative automation features can be added according to requirements and combined with value-added features, such as lamination, cold foil, hot foil, gravure, and screen printing.

THE GLOBAL SUPPORT

Customer Care is an integral part of any partnership between Nilpeter and our customers. With the advanced technology of the FB-Line, services such as online trouble-shooting, automatic software upgrades, ordering of spare parts, and more, are carried out both faster and more efficiently.

Customer Care ensures the highest availability and performance from your production equipment. Nilpeter provides service from Customer Care Centers in Denmark, USA, and Thailand, as well as regional support across Europe, South America, North America, Africa, the Middle East, Asia, and Oceania.

Reel diameter, rewind, max.	1016 (40")	1016 mm (40")

THE NEXT STEP

Like what you see? Then reach out to your local Nilpeter representative, and set up a live demo of the FB-Line at one of our state-of-the-art Technology Centers.

The Technology Centers host large spaces for operating presses, well-equipped pre-

press areas, customer lounges, as well as training and meeting rooms. Our multi-lingual teams are ready to show you the full potential of the press and prepared to print any job you wish to see.

We look forward to showing you the new FB-Line!
